

Capabilites

Schultz Precision Tooling is a full-service tool & die shop with the ability to develop and produce superior tooling for a sophisticated market. Creative design and engineering coupled with precise and careful manufacturing under stringent quality control has made Schultz Precision Tooling a dependable supplier of quality products. We are committed to the quality service expected by our customers. Our primary goal is to provide superior carbide, steel and/or ceramic precision components to your specification along with prompt delivery. Our location in the middle of "Carbide Valley" in western Pennsylvania gives us the advantage of a stable and skilled labor market and a geographic position that permits easy and rapid shipment.

These proven methods, coupled with the active and enthusiastic search for the newest and best ideas of manufacturing, will continue to make Schultz Precision Tooling the finest choice for your tooling needs.
